CREATE TABLE

```
CREATE TABLE jouet (
      id int,
      nom varchar(255),
      description varchar(255),
      categorie varchar(255),
      prix varchar(255)
);
```

DROP TABLE

```
DROP TABLE jouet;
```

ALTER TABLE

```
ALTER TABLE jouet ADD resume varchar(255);
```

```
ALTER TABLE Customers DROP COLUMN resume;
```

ALTER TABLE - ALTER COLUMN

SQL Server / MS Access:

```
ALTER TABLE table_name

ALTER COLUMN column_name datatype;
```

My SQL / Oracle (prior version 10G):

```
ALTER TABLE table_name

MODIFY COLUMN column_name datatype;
```

Oracle 10G and later:

```
ALTER TABLE table_name

MODIFY column_name datatype;
```
